Javascript Frontend Developer with **4 years** of experience developing high quality web applications.

I love building web applications with the latest technologies in frontend. I have 4 years of experience with technologies such as **HTML** , **CSS**, **Angular** ,**Next js** , **React js** and **Typescript**.

I have a lot of experience using modern state management libraries such as Redux. When developing an application, I have used Redux Toolkit as a way to simplify my code and make it more readable.

EXPERIENCE

Cloud bank and Mirantonmatador group ,Lagos - Frontend developer

April 2022 - October 2022

Internship role :

- Used Next js to build a shopping cart website.
